

§ 1032.14

(8) The applicable diversion limits in paragraph (d)(2) of this section may be increased or decreased by the market administrator if the market administrator finds that such revision is necessary to assure orderly marketing and efficient handling of milk in the marketing area. Before making such a finding, the market administrator shall investigate the need for the revision either on the market administrator's own initiative or at the request of interested persons if the request is made in writing at least 15 days prior to the month for which the requested revision is desired effective. If the investigation shows that a revision might be appropriate, the market administrator shall issue a notice stating that the revision is being considered and inviting written data, views, and arguments. Any decision to revise an applicable percentage must be issued in writing at least one day before the effective date.

(e) Producer milk shall not include milk of a producer that is subject to inclusion and participation in a marketwide equalization pool under a milk classification and pricing program imposed under the authority of a State government maintaining marketwide pooling of returns.

(f) The quantity of milk reported by a handler pursuant to § 1032.30(a)(1) and/or § 1032.30(c)(1) for the current month may not exceed 125 percent of the producer milk receipts pooled by the handler during the prior month. Milk diverted to nonpool plants reported in excess of this limit shall be removed from the pool. Milk received at pool plants in excess of the 125 percent limit, other than pool distributing plants, shall be classified pursuant to § 1000.44(a)(3)(v). The handler must designate, by producer pick-up, which milk is to be removed from the pool. If the handler fails to provide this information the provisions of paragraph (d)(5) of this section shall apply. The following provisions apply:

(1) Milk shipped to and physically received at pool distributing plants shall not be subject to the 125 percent limitation;

(2) Producer milk qualified pursuant to § _____.13 of any other Federal Order in the previous month shall not be in-

cluded in the computation of the 125 percent limitation; provided that the producers comprising the milk supply have been continuously pooled on any Federal Order for the entirety of the most recent three consecutive months.

(3) The market administrator may waive the 125 percent limitation:

(i) For a new handler on the order, subject to the provisions of paragraph (f)(3) of this section, or

(ii) For an existing handler with significantly changed milk supply conditions due to unusual circumstances;

(4) A bloc of milk may be considered ineligible for pooling if the market administrator determines that handlers altered the reporting of such milk for the purpose of evading the provisions of this paragraph.
